REQUEST FOR ACCESS

Date: 2-13-96  
Serial Number: 599.543  
Filing Date: 10-18-90  
Applicants: Oppenheimer

Sir,

Request is hereby respectfully made for access to the file history of the following  
abandoned application referred to in U.S. patent number 5,266,683 or printed  
application number \_\_\_\_\_.

Respectfully submitted,

Chen Bezant

**United States Patent** [19]  
**Oppermann et al.**

[11] Patent Number: **5,266,683**

[45] Date of Patent: **Nov. 30, 1993**

**[54] OSTEOGENIC PROTEINS**

[75] Inventors: **Hermann Oppermann, Medway; Eagle Ozkaynak, Milford; Thangavel Kuberasampath, Medway; David C. Raeger, Hopkinton; Roy H. L. Pang, Medway, all of Mass.**

[73] Assignee: **Stryker Corporation, Kalamazoo, Mich.**

[\*] Notice: The portion of the term of this patent subsequent to Nov. 2, 2010 has been disclaimed.

[21] Appl. No.: **841,646**

[22] Filed: **Feb. 21, 1992**

**[57] ABSTRACT**

Disclosed are (1) osteogenic devices comprising a matrix containing substantially pure natural-sourced mammalian osteogenic protein; (2) DNA and amino acid sequences for novel polypeptide chains useful as subunits of dimeric osteogenic proteins; (3) vectors carrying sequences encoding these novel polypeptide chains and host cells transfected with these vectors; (4) methods of producing these polypeptide chains using recombinant DNA technology; (5) antibodies specific for these novel polypeptide chains; (6) osteogenic devices comprising these recombinantly produced proteins in association with an appropriate carrier matrix; and (7) methods of using the osteogenic devices to mimic the natural course of endochondral bone formation in mammals.
